Concept and Application of Transdisciplinarity in Intellectual Discourse and Research Hester du Plessis 2014-02-01 In the past four decades, transdisciplinarity has gained conceptual and practical traction for its transformative value in accounting for the complex challenges besetting humankind, including social relations and natural ecosystems. The need to develop frameworks for joint problem-solving involving diverse stakeholders is unquestionable. Besides generating inclusivity, which embraces academia, civil society, and policymakers in the public and private sectors, transdisciplinarity allows for the appreciation of phenomena from a multiplicity of angles and affords societies creative ways of seeking solutions to challenges that may appear intractable. This book puts forward alternatives within this arena and attempts to directly respond to the multilayered challenges of diffuse disciplines, interlinked socioeconomic problems, impacts of globalization, technological advancements, environmental concerns, food security, and more.

But Will the Planet Notice? Gernot Wagner 2011-09-27

You are one of seven billion people on Earth. Whatever you or I do personally—eat tofu in a Hummer or hamburgers in a Prius—the planet doesn't notice. In our confrontation with climate change, species preservation, and a planet going off the cliff, it is what several billion people do that makes a difference. The solution? It isn't science, politics, or activism. It's smarter economics. The hope of mankind, and indeed of every living thing on the planet, is now in the hands of the dismal science.

Fortunately, we've been there before. Economists helped crack the acid rain problem in the 1990's (admittedly with a strong assist from a phalanx of lawyers and activists). Economists have helped get lead out of our gas, and they can explain why lobsters haven't disappeared off the coast of New England but tuna is on the verge of extinction. More disquietingly, they can take the lessons of the financial crisis and model with greater accuracy than anyone else the likelihood of environmental catastrophe, and they can help save us from global warming, if only we let them.

Invisible Pete Hautman 2012-02-07 You could say that my railroad, the Madham Line, is almost the most important thing in my life. Next to Andy Morrow, my best friend. Lots of people think Doug Hanson is a freak -- he gets beat up after school, and the girl of his dreams calls him a worm. Doug's only refuge is creating an elaborate bridge for the model railroad in his basement and hanging out with his best friend, Andy Morrow, a popular football star who could date any girl in school. Doug and Andy talk about everything -- except what happened at the Tuttle

place a few years back. It does not matter to Andy that we live in completely different realities. I'm Andy's best friend. It does not matter to Andy that we hardly ever actually do anything together. As Doug retreats deeper and deeper into his own reality, long-buried secrets threaten to destroy both Doug and Andy -- and everything else in Doug's fragile world.

Breathe Belisa Lozano-Vranich 2014-02-14 Using straightforward jargon-free language, BREATHE presents Dr. Belisa's unique approach to breathing exercises. It is a

book for people who are looking to address their fatigue, sleeping problems, anxiety, and stress - all of which are worsened by shallow, erratic inefficient breaths and, consequently, suboptimal oxygenation of the body and brain at a cellular level. In addition, the exercises and theory taught in BREATHE will result in better endurance in sports. You'll be taking care of yourself from the inside out. Dr. Belisa's method teaches you to relearn or remember how you used to breathe rather than teach you a skill requiring the attention and motivation that it takes to acquire a new habit. Dr. Belisa asks you put aside ten minutes a day for fourteen days, working from your baseline, and pushing yourself just as you would in a gym or in physical therapy. The result: more energy, less pain, lower cortisol (and control of belly fat), less GI problems, and a better immune system. The explosion of technology, longer hours spent seated at a desk or car, and high levels of daily stress everyone accepts as normal have had a tremendous effect on the way people breathe. This in turn has created or exacerbated medical problems such as high blood pressure, irritable bowel, and insomnia. BREATHE is a primer that covers all the critical core issues related to oxygen, your lungs, and your breathing patterns. It teaches you how to breathe in an anatomically congruous way that maximizes inhales and exhales, lung expansion, and ribcage flexibility. Finally, BREATHE is perfect for someone wanting to explore concepts of mindfulness and meditation. If you are looking to improve such brain functions as focusing and problem solving, or if you just want to relax and rejuvenate by quickly ridding yourself of oxidative stress of the day, this

book is for you.

When Preston wants his own cover story to go visit a girl he met online, Max doesn't think twice about it. But then Preston never comes home. And the evidence starts to pile up—terrifying clues that lead to Preston's body. Terrifying clues that point to Max as the killer....

Disciple IV Abingdon Press 2005-05 DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE

TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

**Borders: A Very Short Introduction** Alexander C. Diener  
2012-08-06 Compelling and accessible, this Very Short Introduction challenges the perception of borders as passive lines on a map, revealing them instead to be integral forces in the economic, social, political, and environmental processes that shape our lives.

Highlighting the historical development and continued relevance of borders, Alexander Diener and Joshua Hagen offer a powerful counterpoint to the idea of an imminent borderless world, underscoring the impact borders have on a range of issues, such as economic development, inter- and intra-state conflict, global terrorism, migration, nationalism, international law, environmental sustainability, and natural resource management. Diener and Hagen demonstrate how and why borders have been, are currently, and will undoubtedly remain hot topics across the social sciences and in the global headlines for years to come. This compact volume will appeal to a broad, interdisciplinary audience of scholars and students, including geographers, political scientists, anthropologists, sociologists, historians, international relations and law experts, as well as lay readers interested in understanding current events.

SUPERNATURAL THRILLER - Book 1 of the MORIUM

TRILOGY If you had the powers to avenge yourself...

would you? Bullied... Years of shame... Lexi and Nathan knew pain. MORIUM is the story of Alexandria and Nathan... and Stacy. Three teenagers who were victims of bullying all through high school. They kept their torment a secret from their family and tried to cope in their own way.

They only had each other. Their friendship saw them through the seemingly endless years of suffering. But hope was in sight... they will be graduating soon. The vision of a new life away from the bullies and the constant humiliation, gave them something to look forward to. If only that day came sooner. One night, Lexi and Nathan saw an object fall from the sky and went to investigate. As they touched the rock, a strange power entered their bodies. Suddenly, they're not helpless anymore. They can get revenge for all the suffering and pain they had to endure. How will they use these powers? MORIUM discusses the moral dilemma of doing what's right against getting revenge. When your dignity has been shattered and your life has been a living hell... what is RIGHT? Manga Melech Ryo Azumi 2010 "The rise and fall of kings and nations!"--Cover.

Drip Irrigation for Agriculture Jean-Philippe Venot 2017-07-06 Initially associated with hi-tech irrigated agriculture, drip irrigation is now being used by a much wider range of farmers in emerging and developing countries. This book documents the enthusiasm, spread and use of drip irrigation systems by smallholders but also some disappointments and disillusion faced in the global South. It explores and explains under which conditions it works, for whom and with what effects. The book deals with drip irrigation 'behind the scenes', showcasing what largely remain 'untold stories'. Most research on drip irrigation use plot-level studies to demonstrate the technology's ability to save water or improve efficiencies and use a narrow and rather prescriptive engineering or economic language. They tend to be grounded in a firm belief in the

technology and focus on the identification of ways to improve or better realize its potential. The technology also figures prominently in poverty alleviation or agricultural modernization narratives, figuring as a tool to help smallholders become more innovative, entrepreneurial and business minded. Instead of focusing on its potential, this book looks at drip irrigation-in-use, making sense of what it does from the perspectives of the farmers who use it, and of the development workers and agencies, policymakers, private companies, local craftsmen, engineers, extension agents or researchers who engage with it for a diversity of reasons and to realize a multiplicity of objectives. While anchored in a sound engineering understanding of the design and operating principles of the technology, the book extends the analysis beyond engineering and hydraulics to understand drip irrigation as a sociotechnical phenomenon that not only changes the way water is supplied to crops but also transforms agricultural farming systems and even how society is organized. The book provides field evidence from a diversity of interdisciplinary case studies in sub-Saharan Africa, the Mediterranean, Latin America, and South Asia, thus revealing some of the untold stories of drip irrigation.

Conservation Laws and Open Questions of Classical Electrodynamics M Ribaric 1990-04-02 The monograph reflects the current standard of knowledge about the open questions considered, taking care to collect and collate all the relevant ideas, facts and formulae which have been until now widely scattered throughout the literature. For the first time, these aspects are collated in book form. Care is taken to clarify the issues, give a systematic

collection of conditions which prospective solutions of these open questions have to meet, and gather and collate various useful theoretical concepts and results.

Contents: Conservation Laws of Classical Electrodynamics: Basic Equations of Classical Electrodynamics Conservation Laws for a Continuous Electromechanical System Electrodynamic Steady States Lorentz-Covariant Formulations Electromagnetic Radiation Energy and Linear, Angular and Boost Momenta Radiated by a Charged Mechanical Medium Comparison of the Properties of Maxwell and Electrodynamic Densities of Energy, Linear and Angular Momenta, and Their Flows Physical Significance of the Retarded Lorentz-Gauge Potentials Classical Pointlike Charged Particles Pointlike Charge Motion of Classical Pointlike Charged Particles in External Force Fields Asymptotic Behaviour of Trajectories of Classical Pointlike Charged Particles in Response to a Small and Slowly Changing External Force
