How to Trade Forex with Zero Fear Christo Ricardo It is huge step when you make the decision to become a Forex trader. Most brand new Forex traders are getting into this business because they think they can make quick money and become rich beyond their dreams. While that may be true, it is not as easy as one thinks and certainly will not happen as soon as one thinks. There are only two groups of people who are doing business in the markets, the professionals and the retail investors and traders, which do you want to be? By buying this book you are taking the first step needed to end up in the group that achieves consistent low risk profits on a daily basis, the professionals and the smart money. If you are not ready to take that step yet then you may be a part of the group called the sheeple of the herd that provides those profits. While that may seem like a harsh statement, I think it's important to point out the a few of the harshest realities of how the markets work right up front, so you know what's at stake when your hard-earned money is at risk in the live market. Now with the advent of YouTube anyone with a video camera can record a video, plop it up on the internet and brand new unknowledgeable traders who are looking for information and seeing this and going "oh this must be right". Beware of this type of marketing as it can and will get you and your account into a lot of trouble very quickly. It is not about how much you know in

this business but about the quality of what you know. Instead of learning it the simple way and keeping things very simple brand new traders tend to over complicate their learning curve, don't be that trader. You can use this book and the references, suggestions and tips in it to go further into your educational studies of the markets and there dynamics. Knowing market dynamics is going to be critical for you to have the winning edge you will need to be a successful market participant. By studying what this book suggests you will not become one of the 97% of the sheeple of the herd.

Turning Losing Forex Trades into Winners Gerald E. Greene 2008-09-15 An effective way to reverse a trade's fortune Almost all trading books focus on "winning" trades. But winning trades can be hard to come by, especially when you're just starting out. Turning Losing FOREX Trades into Winners takes a look at this discipline from a different angle, examining effective methods for dealing with trades that are in a losing position. First, it guides the trader through the various steps of determining if a trade is with or against the overall trend. Then, it explains how to decide when a trade should be closed or left open. While this reliable resource is filled with in-depth insights and expert advice that will help readers gain a better understanding of today's FOREX market, it also contains hundreds of chart examples that will provide step-by-step instructions on how traders can recover from losses.

Forex Simon Kostrava 2016-10-27 Nowadays, you see so many advertisements for forex and equity trading platforms as never before. A new global multi-billion dollar market is rising up. And it is aimed at you. It looks easy to invest and make a profit. Likewise, living the life of freelancer who does not need to work, because your money works instead of you. You just sit in front of a notebook, a tablet or even a mobile device, then click and earn. Never was it so easy to buy and sell different currencies, stocks or commodities. You do not even need a lot of money or money at all. Leverage

is king these days. And leverage is also the start of your fall. But do not fool yourself. I have encountered a lot of young people who believe they can earn just by investing or trading. They do not see forex markets or stock exchanges as places where only hard work is rewarded. That is not surprising. You watch the movie "The Wolf of Wall Street" and see how fantastic, funny and easy that life is. Before that movie, there was the TV series "Capital City", full of smart guys and women with now obsolete computers and phones, who were able to fend off stress and earn a lot of money. My dream was to be like them. And that is the dream for many others. Once you become a trader in a bank, you easily move to another dream. Not to be an employee, but to be an employer. To have your own trading outlet. To earn for yourself and not for a bank. And that is the crossroads that everyone has to encounter in order to choose which way to go. One is more exciting, one is safer. But that is not so important. All stories here are based on hard facts, on things I have seen with my own eyes.

Trading The Forex Market - Repeating Setups That Beat Your Broker Larry Palmer 2012-10-05 Are you tired of forex trading courses, forex strategies, forex trading

systems and books that don't really teach you how to trade and make money? This book does not waste your time with boring stories and basic, general information just to fill up pages! "Trading The Forex Market - Repeating Setups That Beat Your Broker", is a complete comprehensive forex trading guide that's suited for all experience levels & covers all of the important aspects you need to succeed. Whether you trade short term or longer term, these forex trading strategies will turn your trading around to profitability very quickly. The forex market has repeatable setups that happen over & over, that is the foundation of the strategies. These favorable price action setups are also combined with specific indicators & candle patterns that all work very well at confirming each other. There is absolutely no silly stuff in the course such as "magical theories" and page after page of useless information. These techniques and this forex trading education will have you trading like a true professional and develop your trading mind around the WHOLE trade, so you will become a trader, not just a strategy user! Many forex traders use too many indicators and rely solely on them, this is a big mistake and contributes to most of your losses. The reason is that the indicators were not created for 24 hour trading like the forex market, and because they need to be combined with other techniques such as price action because they lag behind price. This forex trading course will show you how to use only a handful of indicators & put your efforts into spotting the repeatable setups that are right in front of you all the time. That's where the big money is. From scalping the forex market to trading medium & longer term, you're

covered. The EUR/USD trade using the United States Dollar Index as the entry and the Ultimate Moving Average Play are two of the forex strategy highlights in the course. They allow you to profit thousands of pips a year! Good forex strategies are only a small part of the forex trading game and this course. Without proper forex trading education, money management & overall trade management, the best forex strategies will do you absolutely no good at all! Sections on management of your money & trades are included & will teach you how to keep losses to a minimum of 1%-3% no matter the size of your account. You will also learn techniques on how to form timely exit opinions for any forex strategy which is very important & has the biggest impact on your trading success along with proper trade management. Exits are not talked about a lot in the forex market for some reason, everyone is only interested in strategies. This is another big mistake traders make, but this forex trading guide covers that & a whole lot more making it possible for you to become an all around excellent trader. The author Larry Palmer, is an experienced trader who started his career in the stock market and has taught his forex trading techniques and money/trade management guidelines to traders from all around the world. He is the founder of www.1on1fx.com

[How to win more in Forex](#) Richard Christopher 2015-12-14 As a brand new investor

and trader with zero knowledge of the business you are at a loss as to what information you actually do and do not need. Much of what the current trading education industry is putting out is not only giving you information that is all backwards, it is very unrealistic to do in the live markets, and can get you into a lot of trouble. Why would you want to learn something that could potentially cause you to lose money right away in your new trading business? The trading education industry is not regulated so beware of that. Anyone can put out a YouTube video of anything and brand new traders who are watching these types of things thinking that what they are viewing are the right things to do. I wrote How to win more in Forex for all beginning aspiring investors and traders who are just getting their head around doing the day trading and swing trading business. How to win more in Forex is for people who want to start their own business and become investors and traders in today's financial markets, but have zero experience and are looking for the best quality information to get them started. Many of the things I tell brand new investors and traders in all my books may sound like I am a broken record and some things you read may sound repetitive. I do that for a specific reason because much of what trading is about is doing those same actions over and over again repetitively to make money the same way every day. It is the only way professional traders do it and how they develop their edge to win in the live markets against the best market participants in the world. The reason

How to win more in Forex is unique is that it is going to tell you about who your competition is and how you can beat them, what you need to study first that will make you rich fast, where you need to go to get consistently profitable quickly, when you should and should not be in the live market and how about the other information you need to know to be able to trade and invest in today's financial markets (or any tradable market) with confidence and zero fear and to be able to do it the right way from the start. When you are done reading How to win more in Forex you will have an excellent basic explanation of what and what not to do before you even study anything or do any kind of education. The information in How to win more in Forex will put you on the fast track to becoming a successful self-directed investor and trader with very little money invested other than the cost of How to win more in Forex, learning it Harvard or Columbia business school would cost one hundred thousand dollars or more.
