Blue Gold Clive Cussler 2000-08-01 Clive Cussler's New York Times bestselling Blue Gold, now available in ebook, is a heart-pounding thriller in the NUMA adventure series. Kurt Austin navigates the Amazon jungle in search of a legend that could change the path of science—but secretive powers will do anything to stop him. From deep within the Venezuelan rain forest emanates the legend of a white goddess and a mysterious tribe with startling technical accomplishments. Few believe the tribe exists—and even fewer suspect its deity may hold knowledge that can change the course of history. For National Underwater & Marine Agency crew leader Kurt Austin, an investigation into the sudden deaths of rare whales leads him to the Mexican coast, where someone tries to put him and his mini-sub permanently out of commission. Meanwhile, in South America's lush hills, a specially assigned NUMA crew turns up the white-goddess legend—and a murderous cadre of bio-pirates intent on stealing

medicinal secrets worth millions. Soon Austin and his crew realize they're working the opposite ends of the same grand scheme. A billionaire California tycoon is poised to rise to power by monopolizing the earth's vastly depleted freshwater reserves and ultimately dominate the world. Austin has a hunch Venezuela's mythical tribal goddess has some real roots in science, and may be the key to locating a secret formula that could turn vast amounts of seawater into fresh. But with each step into the bush, he and his NUMA team feel like fish out of water—and must fight a deadly, twisting trail of enemies through a dense jungle of treachery, blackmail, and murder.

The God Organ Anthony J. Melchiorri 2014-10-11 Immortality is within reach. In 2063, a biotechnological revolution sweeps the nation. Behind this movement is Chicago-based medical giant LyfeGen. The company leads the biotech industry with their Sustain, an implantable artificial organ designed to grant its recipients near-immortality. But many of those recipients are suddenly dying. Biomedical scientist Preston Carter developed the Sustain to improve and save lives. Yet there are others that would see him fail. Extreme religious groups, radical movements, and competing corporations would prefer to see LyfeGen collapse rather than allow “the god organ” to fundamentally alter medicine and the human body. In a race against time, Carter must learn to trust resourceful journalist Audrey Cook. She may hold the key to discovering who is sabotaging the Sustain. And with the organ already implanted in his own body, Carter must uncover the truth before he's killed by his invention. THE GOD ORGAN is a near-future medical thriller that takes the reader on a suspenseful ride filled with sinister conspiracies, intriguing biomedical science, and rampant corruption that will leave readers wondering just how dangerous becoming a god may really be.

2034 Elliot Ackerman 2022-03-08 An instant New York Times Bestseller! "Consider this another vaccine against disaster. Fortunately, this dose won't cause a temporary fever—and it happens to be a rippingly good read." —Wired "This crisply written and well-paced book reads like an all-caps warning for a world shackled to the machines we carry in our pockets and place on our laps . . ." —The Washington Post

From two former military officers and award-winning authors, a chillingly authentic geopolitical thriller that imagines a naval clash between the US and China in the South China Sea in 2034—and the path from there to a nightmarish global conflagration. On March 12, 2034, US Navy Commodore Sarah Hunt is on the bridge of her flagship, the guided missile destroyer USS John Paul Jones, conducting a routine freedom of navigation patrol in the South China Sea when her ship detects an unflagged trawler in clear distress, smoke billowing from its bridge. On that same day, US Marine aviator Major Chris "Wedge" Mitchell is flying an F35E Lightning over the Strait of Hormuz, testing a new stealth technology as he flirts with Iranian airspace. By the end of that day, Wedge will be an Iranian prisoner, and Sarah Hunt's destroyer will lie at the bottom of the sea, sunk by the Chinese Navy. Iran and China have clearly coordinated their moves, which involve the use of powerful new forms of cyber weaponry that render US ships and planes defenseless. In a single day, America's faith in its military's strategic pre-eminence is in tatters. A new, terrifying era is at hand. So begins a disturbingly plausible work of speculative fiction, co-authored by an award-winning novelist and decorated Marine veteran and the former commander of NATO, a legendary admiral who has spent much of his career strategically outmaneuvering America's most tenacious adversaries. Written with a powerful blend of geopolitical sophistication and human empathy, 2034 takes us inside the minds of a global cast of characters--Americans, Chinese, Iranians,

Russians, Indians--as a series of arrogant miscalculations on all sides leads the world into an intensifying international storm. In the end, China and the United States will have paid a staggering cost, one that forever alters the global balance of power. Everything in 2034 is an imaginative extrapolation from present-day facts on the ground combined with the authors' years working at the highest and most classified levels of national security. Sometimes it takes a brilliant work of fiction to illuminate the most dire of warnings: 2034 is all too close at hand, and this cautionary tale presents the reader a dark yet possible future that we must do all we can to avoid.

The future of the human race relies on their success. Can the Hunters salvage what remains of humanity? Or is it already too late?

At All Costs Sam Moses 2007-09-04 In this gripping, page-turning account, Sam Moses has told a story in the tradition of Sebastian Junger's *A Perfect Storm*, Robert Kurson's *Shadow Divers*, and Hampton Sides's *Ghost Soldiers*. It's a story about the heroism of two men in battle at sea during World War II, and one woman fleeing Nazi Norway with her child. It's about how courage can change the course of history. **AT ALL COSTS: How a Crippled Ship and Two American Merchant Marines Turned the Tide of World War II** is the astonishing untold account, with original historical reporting, of how two men faced unfathomable danger to help save the island of Malta, Churchill's crux of the war. In 1942, the tiny island of Malta was the most heavily bombed place on earth. Hitler needed Malta as a stepping-stone to get to the oil in Iraq and Iran (Persia at the time). Blockaded by sea, Malta was running on empty, in food, fuel and ammunition. Axis U-boats and dive-bombers made supply convoys to Malta more like suicide missions. In this last-hope convoy, 50 warships escorted 13 freighters carrying aviation fuel, and a single critical tanker, the SS *Ohio*, with 107,000 barrels of oil from Texas. Winston Churchill had traveled to Washington and asked FDR for the tanker—his prime ministership was at stake over this mission to Malta. Relentlessly dive-bombed and repeatedly torpedoed, the *Ohio* suffered huge hits and was abandoned. Two young American merchant mariners—pulled from the sea after their own ship went down in flames—boarded the ravaged tanker, repaired her guns and fought off German and Italian dive-bombers, as the sinking *Ohio* was towed at 4 knots toward Malta with a tiny crew of volunteers. Sam Moses' **AT ALL COSTS** is a triumphant story of human bravery: fearless, selfless acts by men determined to save a ship and win a war; profound communal courage from an island under brutal siege; and leaders who

understood the cause of freedom. Kirkus (starred review) A historical footnote provides a riveting tale of true American grit during World War II. In 1942, the island of Malta was the primary launching point in the Mediterranean for Allied aircraft and submarine attacks against Axis supply convoys. At the height of the North African campaign, Rommel's tanks prepared to sweep into Egypt, Iran and Iraq. The only thing they lacked was the fuel to get there, and the shortage was equally desperate on Malta. The Allies launched Operation Pedestal, a last-ditch effort to re-supply the base by sending a convoy from Britain through the Gibraltar Strait to the beleaguered island. The convoy, which included the American tanker Ohio and the U.S. freighter Santa Elisa, was anything but a milk run. Vietnam vet Moses (Fast Guys, Rich Guys and Idiots, not reviewed) crafts a thrilling adventure on the high seas, though it takes a while to get started. The book's first third juxtaposes Malta's plight against the stories of two American merchant seamen on the Santa Elisa: Lonnie Dales and Fred Larsen, through whose eyes the battle will be viewed in bluecollar detail. Once Operation Pedestal begins, the narrative is all action. The convoy comes under repeated attack, lives are lost, the Santa Elisa is sunk. Dales and Larsen find themselves aboard the wounded Ohio, full to the brim with Texas crude. If they can hold off Nazi attacks and keep their new ship afloat long enough to reach Malta, the operation will be a success. Moses takes readers directly into the heat of battle, demonstrating a strong command of historical detail. Highly recommended for fans of naval adventure. (Agent: Peter Riva/International Transactions, Inc.) "At All Costs is an extraordinary work of research and an exciting read that pays tribute to a crucial enterprise taken against incredible odds. Sam Moses has brought the ghastliness of war and the beauty of heroism together, in jarring union." –Frank Deford "This book tells a great story. But Sam Moses is not just sharing a gripping tale. He is sharing an important and oft neglected story about a battle that played a decisive role in shaping the outcome of WW II. You will meet people who will linger in memory for their bravery, foolishness, or wisdom." –Ken Auletta, author of Backstory "Thrillingly told and beautifully researched, At All Costs is not just the against-all-odds story of the saving of Malta, but also of how the fate of nations

can turn on the personal bravery of two ordinary men.” –Robert Kurson, author of *Shadow Divers* “Sam Moses has skillfully blended the vivid recollections of many eyewitnesses with a wealth of original documentary research to produce an immensely readable and authoritative account of this crucial operation.” –Mark Whitmore, Director of Collections, Imperial War Museum, London, England

Ship of Ghosts James D. Hornfischer 2006 Describes the loss of the cruiser USS Houston during the early days of World War II in the Pacific and the fate of the warship's surviving crew, who were captured by the Japanese and forced to work as slaves on Japan's brutal Burma-Thailand Death Railway.

Moby-Duck Donovan Hohn 2011-03-03 Selected by The New York Times Book Review as a Notable Book of the Year A revelatory tale of science, adventure, and modern myth. When the writer Donovan Hohn heard of the mysterious loss of thousands of bath toys at sea, he figured he would interview a few oceanographers, talk to a few beachcombers, and read up on Arctic science and geography. But questions can be like ocean currents: wade in too far, and they carry you away. Hohn's accidental odyssey pulls him into the secretive world of shipping conglomerates, the daring work of Arctic researchers, the lunatic risks of maverick sailors, and the shadowy world of Chinese toy factories. Moby-Duck is a journey into the heart of the sea and an adventure through science, myth, the global economy, and some of the worst weather imaginable. With each new discovery, Hohn learns of another loose thread, and with each successive chase, he comes closer to understanding where his castaway quarry comes from and where it goes. In the grand tradition of Tony Horwitz and David Quammen, Moby-Duck is a compulsively readable narrative of whimsy and curiosity.

The Last Stand of the Tin Can Sailors James D. Hornfischer 2008-11-12 “This will be a fight against overwhelming odds from which survival cannot be expected. We will do what damage we can.” With these words, Lieutenant Commander Robert W. Copeland addressed the crew of the destroyer escort USS Samuel B. Roberts on the morning of October 25, 1944, off the Philippine Island of Samar. On the horizon loomed the mightiest ships of the Japanese navy, a massive fleet that represented the last hope of a staggering empire. All that stood between it and Douglas MacArthur’s vulnerable invasion force were the Roberts and the other small ships of a tiny American flotilla poised to charge into history. In the tradition of the #1 New York Times bestseller *Flags of Our Fathers*, James D. Hornfischer paints an unprecedented portrait of the Battle of Samar, a naval engagement unlike any other in U.S. history—and captures with unforgettable intensity the men, the strategies, and the sacrifices that turned certain defeat into a legendary victory. Hornfischer 2017-11-14 Here is the extraordinary story of the most consequential campaign of the Pacific War- the U.S. Fifth Fleet's seizure of the Marianas, a relentless deployment of overwhelming force on air, land, and sea that opened the path to total victory over Japan and established a new state of the art in warfare- the first use of the forerunners of today's SEALs; the emergence of massive cross-hemispheric expeditionary operations; the flowering of American naval aviation and carrier power; and the secret training of Marianas-based air crews who would first unleash nuclear fire. From the epic seaborne invasion of Saipan, to the stunning aerial battles of the Marianas Turkey Shoot, to the grinding combat ashore and the devastating bombing campaign that culminated with Hiroshima and Nagasaki, the Marianas were the fulcrum of the Pacific, a kaleidoscope of valor, drama, and tragedy. Who Can Hold the Sea James D. Hornfischer 2022-05-03 A close-up, action-filled narrative about the crucial role the U.S. Navy played in the early years of the Cold War, from the New York Times bestselling author of *The Fleet at Flood Tide* "A lucid, fast-moving and fitting finale to [Hornfischer's] career."—The Wall Street Journal This landmark account of the U.S. Navy in the Cold War, *Who Can Hold the Sea* combines narrative history with scenes of stirring adventure on—and under—the high seas. In 1945, at the end of World War II, the victorious Navy sends its sailors home and decommissions most of its warships. But this peaceful interlude is short-lived, as Stalin, America's former ally, makes aggressive moves in Europe and the Far East. Winston Churchill crystallizes the growing Communist threat by declaring the existence of "the Iron Curtain," and the Truman Doctrine is set up to contain Communism by establishing U.S. military bases throughout the world. Set against this background of increasing Cold

War hostility, *Who Can Hold the Sea* paints the dramatic rise of the Navy's crucial postwar role in a series of exciting episodes that include the controversial tests of the A-bombs that were dropped on warships at Bikini Island; the invention of sonar and the developing science of undersea warfare; the Navy's leading part in key battles of the Korean War; the dramatic sinking of the submarine USS Cochino in the Norwegian Sea; the invention of the nuclear submarine and the dangerous, first-ever cruise of the USS Nautilus under the North Pole; and the growth of the modern Navy with technological breakthroughs such as massive aircraft carriers, and cruisers fitted with surface-to-air missiles. As in all of Hornfischer's works, the events unfold in riveting detail. The story of the Cold War at sea is ultimately the story of America's victorious contest to protect the free world.
